our process

step one

Flake

We start with 100% post consumer flake made from meticulously sourced PET that has been diverted from oceans and landfills.

step two

Material Science

Verdeco's world-class research team combines material science to **achieve optimal IV and minimize heat shrinkage** all while maintaining the recycled content requirement.

step three

Pellet

Through R&D-inspired innovation, we develop customized flake solutions with consistent pellet geometry to meet our customers' end use needs.

step four

Product

Transformative impact begins as rPET pellets become new, sustainable products that provide the same quality as virgin PET.

heët™

by verdeco

100% rPET Made for Hot Fill Products

We're disrupting the sustainable packaging industry with a groundbreaking new solution for your hot fill consumables. Heet by Verdeco is 100% rPET that can be used for any and all food and beverage products that require the hot fill process, including:

- Sports Drinks
- Juices
- Tea
- Sauces
- Marinades
- Alcoholic Beverages

Your sustainable packaging solution is here. Let's build a more sustainable future — together.
